**Wealth
Management**

U.S. Large Caps VS. U.S. Small Caps

Relative Valuations – 6 month average z-score

Data through 9/30/2017. Data Source: Bloomberg.

Large Caps represented by the S&P 500 Index and Small Caps represented by the S&P 600 Index.

Z-score is a statistical measurement of a score's relationship to its mean. A z-score of 0 occurs when the current score is equal to the historical mean.

A Z-score of a 1 represents a 1 standard deviation event, 68% of all events fall within 1 standard deviation (assuming a normal distribution curve).

Composite Valuation for each index is made up of the following metrics which are adjusted by sector:

Price/Earnings: Reflects the closing price for the company at fiscal quarter end divided by earnings per share before extraordinary items for last twelve months.

NTM P/PE: Price to Next Twelve Months Earnings. Calculated as the current market price over the estimated earnings for the next twelve months for the index.

Price/Book: Displays the book value per share for the ending month divided by share price.

Free Cash Flow Yield: Trailing 12 month free cash flow divided by the price.

Non-deposit investment products offered through RBC Wealth Management are not FDIC insured, are not a deposit or other obligation of, or guaranteed by, a bank, and are subject to investment risks, including possible loss of the principal amount invested.

S&P 500 Sector Risk VS. Return

Risk vs Return: U.S. Sectors
January 1990 - September 2017

Standard & Poor's offers sector indices on the S&P 500 Index based upon the Global Industry Classification System (GICS). The GICS structure facilitates industry analysis by classifying companies at four different levels – Sectors, Industry Groups, Industries and Sub-Industries. Due to the global nature and flexibility of the GICS structure, its classifications have become widely used throughout the financial community. For a detailed description of the classification standard, please visit the Standard & Poor's web site at www.gics.standardandpoors.com.

Global Manufacturing PMI

Twelve Month Change

Purchasing Managers' Index (PMI) surveys have been developed in many countries to provide purchasing professionals, business decision-makers and economic analysts with an accurate and timely set of data to help better understand industry conditions. PMI data are based on monthly surveys of carefully selected companies. These provide an advance indication of what is really happening in the private sector economy by tracking variables such as output, new orders, stock levels, employment and prices across the manufacturing sector. An index reading above 50 indicates an increase in the variables since the previous reading.

Disclosures and Definitions

This information is not intended to be used as the primary basis of investment decisions. Because of individual client requirements, it should not be construed as advice designed to meet the particular investment needs of any investor. The figures presented have been obtained from sources we believe to be reliable and current as of September 30, 2017, but cannot be guaranteed as to accuracy and do not purport to be complete.

Index information provided has been calculated on a total return basis with dividends reinvested. The effects of taxes and/or expenses and fees normally associated with an investment account have not been considered. Returns are based on past performance which may or may not be similar to future returns, and are not meant to be representative of any specific investment. Although used as benchmarks for informational purposes, individual indices are not available for direct investment

Sources of Information:

Bloomberg: Bloomberg is a leading provider of data, analytics, electronic trading and financial news.

Ibbotson Associates: Ibbotson Associates is a leading authority on asset allocation, providing products and services to help investment professionals obtain, manage and retain assets.

Morningstar: Morningstar is provider of performance analysis and analytical software.

MSCI: Morgan Stanley Capital International indices are the most widely used benchmarks by global portfolio managers.

Russell: Russell Indices are some of the most widely used benchmarks for domestic portfolio managers.

Standard & Poor's: Standard & Poor's is a provider of independent financial information and analytical services

St. Louis Federal Reserve: The Federal Reserve Bank of St. Louis disseminates economic, financial, and monetary data through its FRED website.

Zephyr Associates: Zephyr Associates is a leader in returns-based style analysis and performance analysis software.

FactSet Research Systems: FactSet is a leading provider of global financial and economic information. FactSet also provides the tools to download, combine, and manipulate financial data for investment analysis.

U.S. Department of Labor: Bureau of Labor Statistics: The BLS is the principle fact-finding agency for the United States Government in the field of labor and economic statistics.

General Information:

CAPE: Cyclically Adjusted Price to Earnings. Calculated as the current market price over a 10 year average of real earnings.

Correlation: Correlation describes the strength of the relationship between two variables. Correlation can be any value between +1 and -1. A value of +1 indicates perfect positive correlation (meaning the variables move together in perfect unison) and -1 indicates perfect negative correlation (meaning the variables move together in perfect negative unison). Generally, combining assets that have low correlations with increase diversification.

Dividend Yield: Multiplies the DPS over the last year then divides the resulting figure by the price.

Fed Funds Rate: The interest rate at which banks lend to each other overnight.

Federal Open Market Committee (FOMC): The branch of the Federal Reserve Board that determines the direction of monetary policy.

Fed Tightening Campaign: Describes a period in which the FOMC raises the fed funds rate in an attempt to tighten the money supply, or decrease the amount of money available in the banking system.

EPS Growth: Historical annual EPS growth for the past five fiscal years as of the report date.

Housing Starts: Annualized number of privately owned housing units that have started construction. Start of construction occurs when excavation begins for the footings or foundations of a building.

Market Cap: Multiplies the price as of the ending day by the shares as of the ending month.

NTM P/PE: Price to Next Twelve Months Earnings. Calculated as the current market price over the estimated earnings for the next twelve months for the index.

Price/Book: Displays the book value per share for the ending month divided by share price.

Price/Earnings: Reflects the closing price for the company at fiscal quarter end divided by earnings per share before extraordinary items for last twelve months.

P/PE: Price to Peak Earnings. Calculated as the current market price over the prior peak earnings of the index.

Recession Shading: Recession dates are provided by the NBER

Sharpe Ratio: A measure of the risk-adjusted return of an investment. It is calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the historical risk-adjusted performance of the investment.

Standard Deviation: A statistical measure of dispersion about and average, which, depicts how widely the returns varied over a certain period of time.

Index Descriptions:

Citigroup 3-Month Treasury Bill: Represents the average yield of the most recent 3-month Treasury Bill issues.

Citigroup Treasury 10+ Year Index: The Treasury Index computes returns for the current 10-year and 30-year on-the-run Treasury that has been in existence for the entire month.

Consumer Price Index – All Urban Consumers (CPI-U): Measures the weighted average change in prices of a fixed basket of goods and services purchased by households defined as All Urban Consumers, a population group that represents around 87 percent of the total population in the United States. The cost-of-living or inflation indicator is computed from data collected by the U.S. Department of Labor's Bureau of Labor Statistics. Not seasonally-adjusted.

Credit Suisse High Yield: Contains tradable below-investment-grade fixed-rate debt obligations, including cash-pay, deferred-interest, step-up, payment-in-kind and defaulted bonds chosen based on market size, liquidity and diversification criteria.

Non-deposit investment products offered through RBC Wealth Management are not FDIC insured, are not a deposit or other obligation of, or guaranteed by, a bank, and are subject to investment risks, including possible loss of the principal amount invested.

Disclosures and Definitions (cont.)

DJIA: Dow Jones Industrial Average is a price-weighted arithmetic average which covers 30 major NYSE industrial companies representing about 25 percent of the NYSE total market capitalization.

Dow Jones UBS Commodity Index: Composed of futures contracts on 19 physical commodities. Component weightings are primarily determined by liquidity. No related group of commodities (e.g., energy, precious metals, livestock and grains) may constitute more than 33% of the index.

HRFI Fund of Funds: Composite Index represents an equally-weighted index of more than 600 fund of hedge funds.

Barclay CTA Index: an industry benchmark of representative performance of commodity trading advisors. There were 533 programs included in the calculation of the Index for the year 2010. The Index is **unweighted and rebalanced at the beginning of each year.**

Bloomberg Barclays US Aggregate: A market-capitalization weighted index of investment-grade fixed-rate debt issues, including government, corporate, asset-backed and mortgage-backed securities, with maturities of at least one year.

Bloomberg Barclays Intermediate Government/Credit: A market value weighted performance benchmark for government and corporate fixed-rate debt issues with maturities between one and 10 years.

Bloomberg Barclays Municipal: A market capitalization-weighted index of investment grade municipal bonds with maturities of at least one year.

Headline Unemployment: Number of unemployed persons as a percentage of the labor force.

ML 10+ Yr Municipal Index: Consists of a subset of The Merrill Lynch US Municipal Securities Index including all securities with a remaining term to final maturity greater than or equal to 10 years.

ML 10+ Yr US Corporate Index: Consists of a subset of The Merrill Lynch US Corporate Index including all securities with a remaining term to final maturity greater than or equal to 10 years.

ML 10+ Yr US Treasury Index: Consists of a subset of The Merrill Lynch US Treasury Index including all securities with remaining term to final maturity greater than or equal to 10 years.

BAML 7-10 Year French Government Index: Consists of EUR denominated sovereign debt publicly issued by the French government in the French domestic or eurobond market: with maturity greater than 7 years but less than 10.

BAML 7-10 Year German Government Index: Consists of EUR denominated sovereign debt publicly issued by the German government in the German domestic or eurobond market: with maturity greater than 7 years but less than 10.

BAML 7-10 Year Italian Government Index: Consists of EUR denominated sovereign debt publicly issued by the Italian government in the Italian domestic or eurobond market: with maturity greater than 7 years but less than 10.

BAML 7-10 Year Japan Government Index: Consists of JPY denominated sovereign debt publicly issued by the Japan government in the Japan domestic market with maturity greater than 7 years but less than 10.

BAML 7-10 Year Spanish Government Index: Consists of EUR denominated sovereign debt publicly issued by the Spain government in the Spain domestic or eurobond market: with maturity greater than 7 years but less than 10.

BAML 7-10 Year US Government Index: Consists of USD denominated sovereign debt publicly issued by the USD government in the US domestic market with maturity greater than 7 years but less than 10.

MSCI EAFE: Morgan Stanley Capital International Europe, Australasia and Far East Index. An arithmetic, market value-weighted average of the performance of several securities listed on the stock exchanges of several developed markets around the world, excluding the United States.

MSCI Emerging Markets Free: A Capitalization-weighted index representing emerging markets in the free (open to non-local investors) world.

MSCI World: An arithmetic, market value-weighted average of the performance of approximately 1700 securities listed on the stock exchanges of several developed markets around the world, including the United States.

FTSE NAREIT Equity Real Estate Investment Trusts (REITs) Contains all tax qualified Equity Real Estate Investment Trusts (REITs) with common shares traded on the New York Stock Exchange, American Stock Exchange or NASDAQ National Market List. A company is classified as an Equity REIT if at least 75 percent of its gross invested book assets are invested in real properties. Preferred stocks, convertible preferred stocks, participating preferred stocks, convertible debentures, warrants, rights and operating partnership units are excluded. Free float-adjusted, market capitalization-weighted.

NASDAQ: A capitalization-weighted index that measures all Nasdaq listed domestic and foreign stocks.

Not in Labor Force, Want Job Now: Number of persons not currently in the labor force (i.e. have given up looking for employment) currently desiring employment.

PMI: A national survey of purchasing managers representative of the state of the manufacturing sector. A PMI above 50 indicates that the manufacturing economy is generally expanding; below 50 that it is generally contracting.

Russell 3000: Composed of the 3000 largest U.S. securities, as determined by total market capitalization. This index represents approximately 98 percent of the investable U.S. equity markets.

Russell 3000 Growth: Measures the performance of those Russell 3000 Index companies with higher price-to-book ratios and higher forecasted growth values.

Russell 3000 Value: Measures the performance of those Russell 3000 Index companies with lower price-to-book ratios and lower forecasted growth values.

Russell 2000: Consists of the smallest 2000 securities in the Russell 3000 Index, representing approximately 8 percent of the Russell 3000 total market capitalization. Returns prior to 1979 represented by the lowest quintile of stocks on the New York Stock Exchange, as provided by Ibbotson Associates.

Russell 1000: Consists of the 1000 largest securities in the Russell 3000 Index, representing approximately 92 percent of the Russell 3000 total market capitalization.

Russell 1000 Growth: Contains those securities in the Russell 1000 Index with greater-than-average growth orientation. Securities in this index tend to exhibit higher price-to-book and price-to-earnings ratios, lower dividend yields, and higher forecasted growth rates than the Value universe.

Russell 1000 Value: Contains those securities in the Russell 1000 Index with a less-than-average growth orientation. Securities in this index tend to exhibit lower price-to-book and price-to-earnings ratios, higher dividend yields and lower forecasted growth rates than the Growth universe.

Russell Midcap: Consists of the smallest 800 securities in the Russell 1000 Index, as ranked by total market capitalization.

S&P 500: Capitalization-weighted benchmark that tracks broad-based changes in the U.S. stock market. The index is calculated on a total return basis with dividends reinvested. Long-term performance is represented by the S&P 90 Index from 1926 through 1956, as provided by Ibbotson Associates, and the S&P 500 Index from 1957 to present.

U6 Unemployment: Total unemployed persons plus all marginally attached workers plus total employed part time for economic reasons
