## Market Week: November 25, 2024

### The Markets (as of market close November 22, 2024)

Wall Street enjoyed a solid week of gains, rebounding from the prior week's losses. Each of the benchmark indexes climbed higher, led by the small caps of the Russell 2000, as investors moved from mega caps to cyclical stocks, which are influenced largely by the economy. Communication services was the only market sector to close in the red, while the remaining sectors moved higher, led by utilities, consumer staples, real estate, and materials. Crude oil prices gained nearly 6.5% last week, driven by increasing conflict between Russia and Ukraine. The dollar and gold prices moved higher as investors sought safe-haven assets, in light of increasing geopolitical risks.

Last week began with stocks closing generally higher as the information technology sector rebounded from a tough prior week. The NASDAQ and the Global Dow each advanced 0.6%, while the S&P 500 gained 0.4% and the Russell 2000 ticked up 0.1%. The Dow fell 0.1%. Yields on 10-year Treasuries slid to 4.41%. Crude oil prices rose 3.3% to settle at \$69.22 per barrel, driven higher by growing concerns over supply cuts. The dollar declined 0.5%, while gold prices advanced 1.8%.

Ten-year Treasury yields closed up 1.7 basis points to 4.41%. Crude oil prices slipped 0.2%, falling to \$69.12 per barrel. The dollar rose 0.4% and gold prices advanced 0.8%. Investors were pensive as they awaited the earnings report from a major AI company.

Wall Street saw a rally last Thursday, with each of the benchmark indexes listed here closing higher as investors shifted toward cyclical stocks. The economy showed evidence of strengthening as jobless claims fell to nearly a seven-month low (see below), and sales of existing homes rebounded in October. The Russell 2000 led the benchmarks, gaining 1.7%, the Dow rose 1.1%, the S&P 500 and the Global Dow each climbed 0.5%, while the NASDAQ ticked up less than 0.1%.
