Source: Forbes.com. America's Top Women Advisors ranking was developed by SHOOK Research and is based on in-person and telephone due diligence meetings to evaluate each advisor qualitatively, a major component of a ranking algorithm that includes: client retention, industry experience, review of compliance records, firm nominations; and quantitative criteria, including: assets under management and revenue generated for their firms. Investment performance is not a criterion because client objectives and risk tolerances vary, and advisors rarely have audited performance reports. Rankings are based on the opinions of SHOOK Research, LLC and not indicative of future performance or representative of any one client's experience. The financial advisor does not pay a fee to be considered for or to receive this award. This award does not evaluate the quality of services provided to clients. This is not indicative of this financial advisor's future performance. For more information: www.SHOOKresearch.com.
